

## Universal Amplifier UAB

### INTRODUCTION

The most flexible universal process controller, the UAB Universal Amplifier Board is a modular product allowing the user maximum choice in selection of input, display, output and housing. The UAB can be ordered as a Eurocard or in a choice of cases. All the options from our instrumentation range are available for the UAB including fast input and high resolution.

### Inputs

- High speed strain gauge - 10mS.
- High resolution strain gauge.
- Voltage.
- Current
- LVDT
- Temperature.
- Rate / totaliser

### Outputs

- Analogue – included.
- Fast analogue.
- Relays
- 20mA current loop.
