

THERMO COUPLE ATTACHMENT

Specification—To Order

APPLICATIONS

- Covers virtually all industries.
- Automotive
- Aerospace
- Power Generation

PCM provide the installation service of thermo-couples to free issue items or site to attach them on to large structures.

The installation can be made to suit the customers requirement, the following methods are adopted :

- Spot welded bead for a grounded installation.
- Brazed bead that is bonded in place using ceramic cement as a base coat and top coat. This is ungrounded.
- ungrounded.

It is important to specify the following to get the optimum requirement.

- Temperature range.
- Speed of response.
- The equipment input requirement – grounded or ungrounded ability.

By providing clear details of the project, environment, accuracy, expectations, Procter & Chester will provide the ideal solution and final product.
