

FOOT PEDAL LOAD CELL

Compression Load Cell

Capacity – Built to order

FEATURES

- Aluminium construction
- Low profile application.
- Fittings designed to suit the application.

APPLICATIONS

- Any pedal application that requires force monitoring.

The load cell design is based on a shear beam principle that provides an accurate measurement from zero to full rated load.

Each application is looked at independently to ensure the correct mechanical solution is provided.

Please contact sales with your application and by return a quotation and specification sheet will be sent to you.
